Spread

The forex spread is the difference between a broker's sell rate and buy rate when exchanging or trading cryptocurrencies. Spreads can be narrower or wider, depending on the currency involved, the time of day a trade is initiated, and economic conditions. Our spread markup fee ranges from 0 - 0.3% of every opened position.

Commission

A trade commission is a fee you pay your broker or financial services representative when you buy or sell a CFD or another type of investment. On Hyrotrade there is a commission fee of 0.2% for every opened position.

SWAP

A swap, also known as a "rollover fee", is charged when you keep a position open overnight. A swap is the interest rate differential between the two currencies of the pair you are trading. It is calculated according to whether your position is long or short. You **DO NOT** pay the SWAP fee on the Hyrotrade platform.

Withdrawal / Deposit fee

Fee for withdrawing your winnings or depositing money. There is none of the withdrawal or deposit fee on Hyrotrade, meaning it's **FREE**.

Open / Close account

Free of charge.

Inactivity fee

If you fail to log in or provide any other action within 3 months of your last activity a,, inactivity fee" will be deducted from your account. This is to maintain a healthy trading environment and to prevent unnecessary maintenance on „dead" accounts.

Performance Fee (Social Trading)

Performance Fee is the percentage of the total Net Profit generated by a strategy on the Copy Trading Account. It is subject to a High-Water Mark and is paid at the end of each month of copying.

It means that: The follower will be charged 10 percent of the total Net Profit generated by the strategy. Let's say, the Copy Trading Account generates USD 700 total Net Profit, then USD 210 will be charged.
